PROFESSIONAL SUMMARY

Aspiring Full Stack Developer with hands-on experience building web applications using Python, Flask, JavaScript, SQL, and relational databases. Experienced in developing secure, multi-user applications with authentication, dashboards, database integration, and reporting features. Strong problem-solving skills with a foundation in cybersecurity and cloud technologies.

EDUCATION

B.Tech in Computer Science & Engineering (Cyber Security)

2023 - 2027

Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal

CGPA: 8.10 / 10

TECHNICAL SKILLS

Programming Languages: Python, SQL

Web Technologies: HTML5, CSS3, JavaScript, Flask, React.js, REST APIs

Database: MySQL

Networking: Computer Networking

Security Concepts: Cybersecurity Fundamentals

Cloud: Amazon Web Services (AWS)

Tools & Platforms: Git, GitHub, VS Code

PROJECTS

Personal Finance Manager

A full-stack finance management web app built with Flask and SQLAlchemy to track income, expenses, and budgets, using Flask-Login for authentication and Chart.js for visualization.

- Developed a full-stack personal finance management web app using Flask and SQLAlchemy to track income, expenses, budgets, and savings goals through a secure, multi-user system.
- Implemented secure user authentication (login/register) with password hashing and session management using Flask-Login.
- Built an interactive dashboard with Chart.js to visualize spending trends, backed by a 6-table SQLite relational database, plus budget alerts and CSV/PDF report export.

Cyber Shield SIEM (Security Information and Event Management System)

A web-based SIEM platform built with Python and Flask to centralize log collection and threat detection, using Chart.js for visualization and SQLite for storage.

- Developed a web-based SIEM platform using Python and Flask to centralize security log collection, monitoring, and threat analysis across multiple sources.
- Implemented rule-based threat detection to identify brute-force login attempts, port scanning, and other anomalous activity through real-time log correlation.
- Built an interactive dashboard with Chart.js for log visualization, alert management, and incident tracking, backed by SQLite for persistent, queryable storage of historical events.

INTERNSHIP

Network Security Associate Virtual Internship — EduSkills (AICTE) & Fortinet, Apr-Jun 2025

Completed a 10-week virtual internship building foundational knowledge of network security concepts, threat detection, and security protocols through hands-on training modules.

CERTIFICATIONS

- Infosys Springboard: Programming Fundamentals using Python - Part 1
- IBM SkillsBuild: Cybersecurity Fundamentals
- AWS Certified Cloud Practitioner
- IBM / CognitiveClass.ai: SQL and Relational Databases 101
